G.K. Chesterton, 1874–1936, British writer

VOCABULARY: transport

1a Look at the means of transport in the box. Match them with the verbs below.

ship taxi (underground) train tram

- 1 to travel/go by ... *bike, boat, ...*

1b Which means of transport do you use? Which do you like / don't you like?

*I usually travel by bus because buses are cheap.
I don't like motorbikes because they're noisy.*

READING

2 Match the means of transport 1–5 with the photos A–E.

- 1 high-speed train 2 sports car 3 passenger ship
4 superjumbo 5 Maglev train

3 Match the means of transport in Exercise 2 with these speeds, then read the article and check your guesses.

- a) 66kph 3 b) 300kph c) 325kph
d) 430kph e) 900kph

Q & A

Every month, *Transport Today* answers your questions.

Q How fast can I travel? What are the top speeds I can go – by sea, on land or in the sky?
James, Liverpool

A You're obviously in a hurry, James!

Let's start with travelling on land. Modern cars can go very fast – an Italian Lamborghini Murcielago has a top speed of about 325 kilometres per hour, but there's a speed limit on the majority of motorways, so you can only drive at around 120kph.

Trains are usually faster than cars. The French high-speed train (TGV) goes at 300kph with passengers, but the Maglev train is even faster, with a top speed of 430kph. This new type of train travels just above the ground, not on it. There are only one or two in use at the moment.

Of course, planes are faster than cars or trains. The new superjumbo (Airbus A380) travels at about 900kph – fast, but slower than the older Boeing 747 jumbo. This flies at 927kph.

But, James, life isn't all about speed. Ships are a nice, easy way of travelling. They're slow – even a fast passenger ship reaches only 66kph – but they're more comfortable and more relaxing than other means of transport. Isn't that important sometimes too?

4 Which information below can you find in the article?

- 1 We can drive at 120kph on motorways in Italy.
- 2 The name of the French high-speed train is the TGV.
- 3 There is a Maglev train in Shanghai.
- 4 The superjumbo can fly non-stop from London to Sydney.
- 5 Both the jumbo and the superjumbo can go at over 850kph.
- 6 Travelling by sea is slow.

GRAMMAR: comparative adjectives

The metro is the busiest system in the world (3.2 billion passengers per year) and the stations are perhaps the most beautiful. Another Russian city, St Petersburg, is called a 'City of Trams' because it has the world's largest tram system – over 720km long.
- New York is a city that is famous for size – the population is larger, the buildings are taller and the sandwiches are bigger than in many other cities. It has the world's largest metro system (with 468 stations), the world's largest station (Grand Central) and the biggest bus system in the world (more than 4,300 buses).
- London has perhaps the most famous buses in the world – the red double-deckers. It also has a good metro or underground system, and it is the oldest in the world. Unfortunately, it is also the most expensive in the world.
- Many people think that public transport in Tokyo is the best in the world. It is certainly very busy and always crowded. In fact, the busiest train station in the world is Shinjuku Station, Central Tokyo, with 3.2 million passengers a day.

Jason Zebehazy

Super Food – Do you eat it?

Eat the right food and you can be healthier. But what is the best food?

Berries, such as blueberries and strawberries, are the number one fruit. They're good for your heart and for

5 your memory. They also fight illnesses such as cancer. For vitamin C, eat an orange every day.

Some vegetables are super food. Broccoli is a good example. It's high in vitamin C and it fights cancer.

Carrots are rich in vitamin A and this is good for your

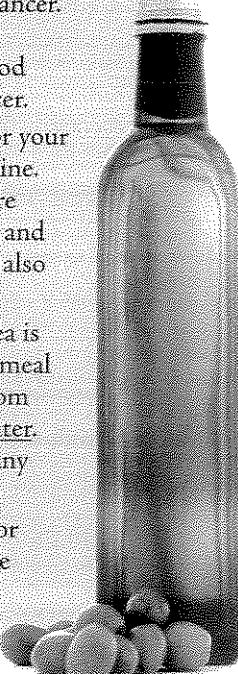

10 skin. Eat garlic often because it's a natural medicine.

It's important to eat a lot of nuts because they are good for your memory. Oily fish, such as salmon and sardines, is very good for your heart. Olive oil is also good for it.

15 Lastly, are there any super drinks? Well, green tea is certainly one. A nice cup of green tea after your meal is good for your health and it can protect you from illnesses. Finally, don't forget to drink a lot of water.

Next time you go shopping, check your basket for these types of food. Eat some super food and live longer.

ÇATAL HÜYÜK

A Çatal Hüyük (now in Anatolia, Turkey) was one of the world's first cities. In fact, many people think it is the oldest city. It was an important and busy place for 2,000 years, from about 7000 BC to 5000 BC. Compared with today's cities, it wasn't big; in 6250 BC, there were only about 6,000 people there.

B The people were, we believe, kind and peaceful. Many of the people were farmers, but the city was also a centre of trade and ideas. Çatal Hüyük was rich and well organised, but life was very short: an average age of 34 years for men and 29 for women. Women were important in this city: many were in high positions and there were a lot of special goddesses.

C There weren't any streets in the city; most of the houses were around a central courtyard. There weren't any doors in the houses. There was an entrance to each house through a hole in the roof and down a ladder. Inside, there were paintings of animals and people on some of the walls.

Necessity is the mother of invention.

Plato, 427BC–347BC, Greek philosopher

READING

1 What do you know about the three people in the photos? Discuss them with a partner.

2 Leonardo da Vinci was a famous inventor. Look at these inventions. Which are his ideas or inventions?

the bicycle the car the diving suit
the helicopter high heels the parachute
the radio the robot the telescope

Read the text *Leonardo da Vinci* quickly and check your ideas.

3 Read the text again. Are these sentences true or false?

- 1 When he was young, Leonardo was at a large school.
- 2 Leonardo was an engineering student.
- 3 A lot of modern inventions use his ideas.
- 4 The robot could only move its legs.
- 5 The car could only travel a short distance.
- 6 Leonardo's helicopter is the same as the modern ones.
- 7 Modern divers use Leonardo's diving glove.

4 Put the inventions in the text in order of importance. Compare with a partner.

GRAMMAR: past simple (affirmative)

When we talk about finished events and times in the past we use the past simple:

In 1500 he returned to Florence.

infinitive *return* → past simple *returned*

5a Read the first paragraph of the text (*His life*) again and find other examples of the past simple. Complete the table below.

Infinitive	Past simple
return	returned

Note: we usually add *-ed* to the infinitive to form the past simple but sometimes there are spelling changes:

study → *studied*, *travel* → *travelled*, *live* → *lived*

► Language reference and extra practice, pages 138–139

5b Complete the sentences with your answers from Exercise 5a. Then listen and check.

- 1 Leonardo _____ his studies of art in 1468.
- 2 He _____ these studies in 1472.
- 3 He _____ money so he started work as an engineer.
- 4 Leonardo _____ as an engineer for 32 years.
- 5 He _____ in Milan from 1472 to 1500.
- 6 He _____ to Florence after 28 years in Milan.

LEONARDO DA VINCI

*Man of art. Man of ideas.
Man of inventions.*

His life

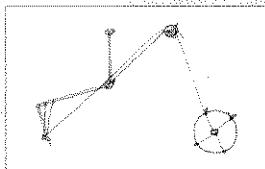

Leonardo da Vinci (1452–1519) lived in a small town in Italy with his grandparents. He studied at home and enjoyed music, singing and mathematics. At the age of 16, he wanted to study art, so he moved to the city of Florence for art classes. He finished his studies after four years. He then worked in Milan as an engineer and he started his life as an inventor. In 1500 he returned to Florence and in 1516 he travelled to France, where he stayed for the rest of his life.

His inventions

Leonardo da Vinci lived and worked before people used electricity and petrol for power, but he had the first ideas for many machines that we use today.

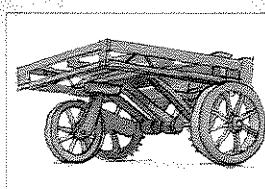

The robot

Leonardo built his robot in 1495. The robot stood up, sat down and held things in its arms.

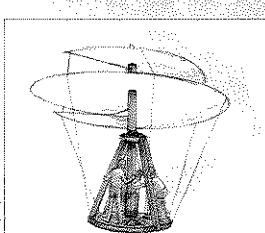

The car

A single passenger drove the car. It travelled 40 metres at a time.

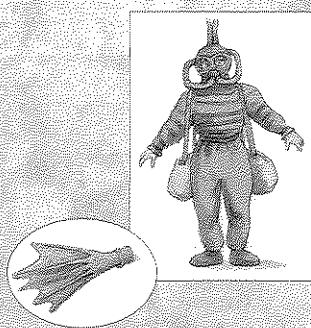

The helicopter

Leonardo designed the first helicopter but he never made it. His design used a screw to lift the helicopter into the air. This is different from the modern design, but the general idea is similar.

The diving suit

Leonardo made the suit of leather and added long pipes to carry the air to the diver. He also invented special gloves for divers. Today, divers use them on their feet!

These are just some of Leonardo's hundreds of inventions. He also invented a parachute and even high heels!

pronunciation

6a **LISTEN** Verb endings The past simple ending -ed has three possible pronunciations. Listen to these examples and repeat them.

/ə/ enjoyed /t/ helped /ɪd/ needed

6b Put the verbs from Exercise 5b in the correct column, then listen to Track 2.16 again, check and repeat the sentences.

GRAMMAR TIP

Some verbs in the past simple are irregular. We don't add -ed to the infinitive.

He had the first ideas. (infinitive have)

He built his robot in 1495. (infinitive build)

7 Read the rest of the text (*His inventions*) again and find the past simple forms of these verbs.

- 1 stand _____ 3 hold _____ 5 make _____

Medical inventions

- 1 The scalpel is one of the oldest inventions in medicine. It is a small, light and very sharp knife. People used it for the first time around 3000 BC in the area of modern Iraq. The scalpel did not change very much for 4,000 years.
- 2 The Chinese invented acupuncture needles around 2000 BC. At first, they did not make needles from metal, but from stone. Today, people in China and other countries use acupuncture for many illnesses.
- 3 People in southern Italy invented the first false teeth about 700 BC. They used pieces of bone, or sometimes second-hand human teeth! After that, false teeth did not change for the next 2,500 years until, in 1770, a Frenchman called Alexis Duchateau first used porcelain, a hard, white material that we still sometimes use today.
- 4 Zacharias Jansen from Holland made the first microscope in about 1590. Through it, objects appeared nine times bigger than their real size, but it did not give a very clear picture. Jansen did not use his invention very much because people at that time did not want to look at small things!

Winds from the East: Chinese inventions

The Chinese invented many things that we use today, long before they appeared in the West.

The Chinese invented paper in the 2nd century BC. Over a thousand years later, in the 12th century AD, Europeans first made paper. Another example is matches: the Chinese had matches in the 6th century, but Europeans did not use them until the 19th century. Paper money is another Chinese invention: Europeans first made it in Sweden in 1661, but the Chinese invented it 800 years earlier, in the 9th century.

Knowledge of other inventions came along the 'Silk Road', linking East and West, and more information came by sea. Sailors brought Chinese ideas to the

Marco Polo travelling by camel caravan,

Arabian Gulf and northern Africa and, from there, they spread north to Europe. Travellers like Marco Polo (1254–1324) also brought stories of Chinese inventions back to Europe.

People who borrow from us: Jane

I live in Rwanda and I'm a widow – my husband died in an accident. I live with my elderly mother and I've got two children. I have to look after all of them.

Two months ago I started my business – I opened a cinema! I borrowed 300 dollars from Credit Aid and I have to pay back six dollars every week for one year. I bought a TV, a video player and some chairs. My brother built the room

and now I show a film every evening. The cinema is always full and I make 15 dollars every week. It's quite easy to run a cinema: I don't have to work in the daytime, but I have to choose good films!

Now my children can go to school because they don't have to work. I can afford better food and, because the cinema is only open in the evening, I can still look after my mother.

A What kind of homes will we live in 20 or 30 years from now? Some people think that many of us will live in 'gated communities'. There will be high walls and fences around our houses and flats. Security guards will control the entrances. Inside, there will be parks and play areas for children, supermarkets, business centres and travel agencies, restaurants, gyms and golf courses.

B These gated communities already exist in many countries. Some of them are like small towns, and in Brazil some even have their own schools. Of course, they aren't cheap places to live in: at Beverley Park, in Los Angeles, houses cost between 12 and 32 million dollars.

C It's clear why people want to live in them. In Johannesburg, South Africa, 65 percent of residents feel unsafe in their homes at night. In many cities, public spaces like parks are sometimes dangerous. A gated community gives people a feeling of security and, after 9/11, people want to feel safe, especially in the USA.

D But not everyone is happy about a future of gated communities, including some top police officers. They say that the people in the communities won't mix with people outside. Also, the gap between the rich and the poor will increase, and society will become more dangerous.

Dear Erdem

How are you? I'm in my new flat now, and I'm really enjoying it.

I'm going to have a housewarming party on Saturday 7th July, starting about 8 p.m. Can you come? A lot of our old friends will be here (I hope!) and I'm going to cook something very special! (It's a secret!)

My new address is above. It's really easy to get here. Take the tube* to Wood Green station. You can walk from there. When you come out of the station, turn right and go up the hill. Turn left at the traffic lights – then you're on my road. Go straight on for about 200 metres. The building is on the left.

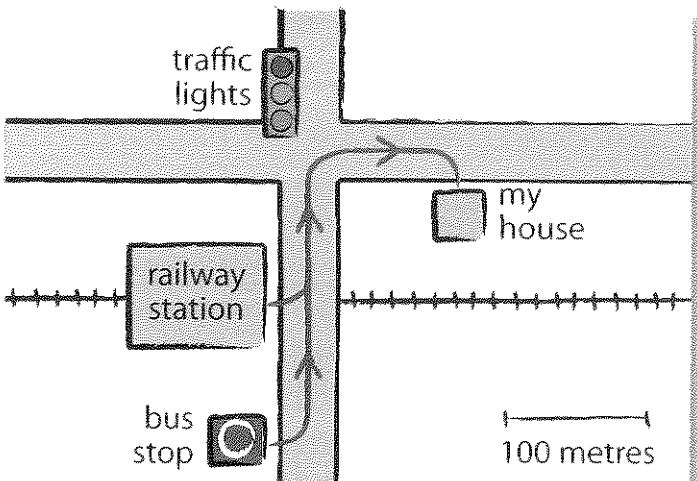

Hope to see you on Saturday 7th.

Best wishes,

Carla

Global nomads

Global nomads are people who have grown up abroad because of a parent's job. They've often had a good life, with large homes and nice holidays, and they're well-educated, international citizens of the 21st century. However, they often feel different from other people and can't stay in one place for a long time. Are you a global nomad? What's your experience?

By: Nina Rendquist (mail) Posted on: 26/10/2006

I'm from Sweden but I left the country when I was six. I've lived in Saudi Arabia and the Philippines. I don't feel at home anywhere, but I think that I've done a lot. Because of my past, I'm good at learning new skills and at meeting people.

By: Maria (mail) Posted on: 27/10/2006

Nina, I really understand you. I spent my childhood saying hello and goodbye. I'm from Argentina but my parents took us from one country to another: Malaysia, Nigeria, Russia. Now I'm living in Paris. I feel I'm a stranger everywhere, but I'm independent and strong. I've travelled, I've seen the world and I speak three languages.

By: Andy (mail) Posted on: 29/10/2006

Like you, I'm proud to be a global nomad – I've lived in Kuwait, Venezuela and Kazakhstan. Sometimes I've felt lonely but I'm comfortable with people from all over the world. And I've become really close to my Mum and Dad – they're like my best friends.

STUDY SKILLS: learning outside the classroom

1 Ways of practising English You can practise your English outside the classroom in many different ways. How often do you do these things outside the classroom?

- use the Internet in English
- watch DVDs/films in English
- use the coursebook CD-ROM
- revise your classwork
- listen to songs in English

2 Many students ask for learning advice on Internet message boards. Look at these questions. Can you give any advice?

- 1 How can I learn vocabulary?
- 2 How can I improve my listening?
- 3 Is it better to learn alone or with friends?

3 Match the e-teacher's advice with the questions in Exercise 2. Have you done any of these things?

A You should do things with the words. Make vocabulary cards and put them in your house so you can see them every day. Put vocabulary in groups and make sentences with them.

B I think you should do both: on your own, you can practise at your speed, but, with friends, you can practise speaking and test each other.

C The Internet is perfect because you can usually listen again and again. Also, listen to songs; you can usually get the song words from the Internet to help you.

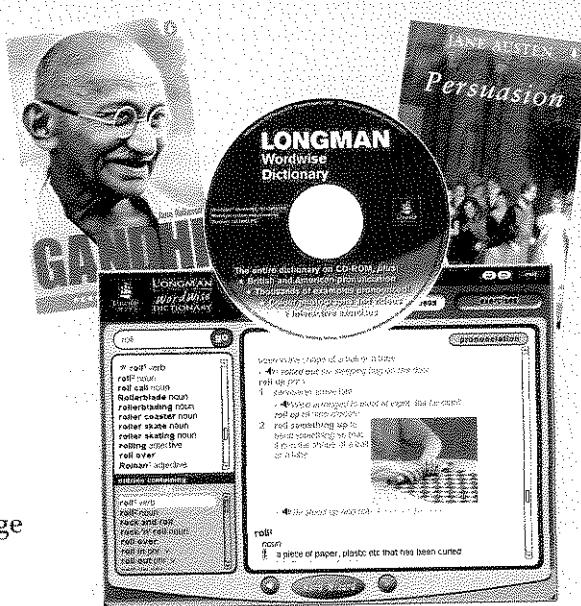

4a Using technology to learn Listen to a lecturer giving a talk about using technology to learn English. Which of these things does he talk about?

radio programmes message boards
language-learning websites TV video clips

4b Listen again and take notes about his advice. Take your notes in the form of a mind map, using these headings. Then compare your notes with Track 2.45 on page 156.

- Writing practice
- Listening practice
- Language-learning sites

5 Look again at all the advice in this Study skills section. Which are the best ideas, do you think? Compare your answer with a partner.

6 Complete this quote with the words in the box. Listen to the end of the talk and check your ideas.

'We remember 20 percent of what we read,

30 percent of what we hear,

I started my business six months ago – it's a laundry business. I wash the clothes of the local taxi drivers! They're all single men, they're very busy and they have to look smart for work. I borrowed 100 dollars from Credit Aid and I have to pay back two

dollars a week. I spent the money on two irons, two sinks and a lot of soap! I have to work very hard every day but now I've got an assistant – my sister! We make about 50 dollars a week, and I save three dollars each week. Now I don't have to worry about the school fees, and perhaps my children can go to university in the future.

I'm using the money to build a house for my family. It's only a small house but we need it very much.

Dear Nadia,

I'm sorry to hear about your problems. I think that you should try to find a better job. Supermarkets usually pay more than restaurants. You shouldn't use your credit cards to buy things – they're very expensive. You should talk to your teachers at the university – they can help you.

Now look at these problems. What advice can you give these people?

1 I'm a student from China. I'm now living in the UK. I'm sharing a flat with three other Chinese students. We're afraid to go out after dark because we can hear a lot of police cars. We don't think that the city is safe. What should we do?

2 I'm a student from Poland. I'm learning English, but I find it very difficult to remember new vocabulary. What should I do?
Veronica

3 I'm from Germany and I'm spending a year in London. I have a lot of friends and I go out a lot. I like eating in expensive restaurants and going to the theatre. The problem is, I'm an ordinary office worker and I haven't got much money. What should I do?

SA: Good morning everyone. Welcome to Cambridge and to the Cambridge English School. Right, now, please look at your maps. There are a lot of interesting places in the city centre. First of all, please find Trinity Street and King's Parade – they're on the left of your map. There are a lot of beautiful colleges on these streets. Opposite Trinity College there's a good bookshop and a small post office.

In the middle of the map, between Trinity College and the main post office, there's the main shopping area, with the market and the shopping centre. The market's nice, with food and clothes and a lot of other things. And it's cheap! The shopping centre's ... well ... to tell you the truth, it's ugly, but there are a lot of shops.

On the right of the map, there's the bus station, next to the park. It's quite busy in the mornings and evenings. Take the bus from there to the railway station, or to London. Any questions so far?

S1: Yes. Is there a library?

SA: Yes, there is. It's in the shopping centre. On your map, there's a person with a book.

S1: Oh, yes. Thank you.

S2: Excuse me, is there a zoo?

SA: No, I'm afraid there isn't, not in the city. OK then, that's all for now. Don't forget – tomorrow at three o'clock, there's a guided tour of the city. Have a good time and learn a lot of English!

Presenter, Dr Simmonds

- P: Dr Simmonds, my idea of a desert is a very hot place with a lot of sand. Is this correct? I mean, what is a desert, exactly?
- s: Well, there are different kinds of desert – hot deserts and cold deserts. And hot deserts aren't always hot; the temperature changes, for example, from 38 degrees to ten degrees ...
- P: Ten degrees! That's cold! When are deserts that cold?
- s: At night. They're hot during the day but cold at night.
- P: Mmm, interesting.
- s: Also, only about 30 percent of the world's deserts are sand – a lot of deserts are just rocks and stones. But all deserts have one thing in

- common: they're very dry, with a maximum of 250 mm of rain a year.
- P: Really? So, why are deserts dry?
- s: Well, for a number of reasons. Sometimes they're a long way from the sea and rain doesn't reach them. Sometimes mountains stop the rain.
- P: OK, so there isn't any water – so how do animals and plants live in deserts?
- s: Life in deserts isn't easy. A lot of desert animals sleep in the day and come out at night to look for food. The kangaroo rat gets all its water from its food. And desert plants have water in them. The Saguaro cactus in North America has five tonnes of water in its body and it sometimes lives for 200 years.
- P: Wow! What about people? How do they live in the desert?
- s: Desert people often live in groups, and move from place to place. They often live at the edges of deserts, not in the middle. The Aborigines of Australia eat desert plants and animals and live that way, but it's a hard life!

- l: Erm, ... I'm not so sure, Andy.
- c: Yeah, ... I don't agree with you.
- A: You don't? Why not?
- c: Well, Andy, the traditional boat races are very popular, and the dance workshops need a lot of people. I'd like to have the dance workshop in the morning, and I'd like to have the international food market in the afternoon. People often go to the market during the races and before the barbecue.
- A: OK. I agree. What about Saturday evening? What would you like to have then, Li?
- l: Why don't we have a drum concert then? The Burmese drum circles are very exciting.
- A: Great idea, Li. That way people either watch a film or watch the

drum concert, if they don't come to the barbecue, of course.

G: At 12 o'clock.
F: That's now! Why don't we go together?
G: That sounds good. Where do you usually eat?
F: It depends. What do you want?

F: OK. I know a quiet café. Let's go there.
G: Good idea! Is it in the centre?
F: Yes, it's next to the post office.
G: OK. Let's go.

Sarah, Travel agent

S: Hello.

TA: Hello, can I help you?

S: Yes, please. Can you give me some information about the Sarong Holiday Resort?

TA: Yes, certainly. What would you like to know?

S: First of all, can you tell me about the accommodation, please?

TA: Yes, of course. All the rooms are double rooms. Some of the rooms have a sea view.

S: I see. Are there any family rooms?

TA: No, I'm afraid not. They can put extra beds in your room for children.

S: And what restaurants are there in the resort?

TA: There are five different restaurants – Thai, Chinese, Indian, Italian and American. You can eat breakfast, lunch and dinner in four of them. I'm afraid you can't have breakfast in the Indian restaurant.

S: The advert says that the resort offers water sports. Can I play other sports, tennis, for example?

TA: I'm sorry. I'm afraid you can't. They only have water sports at the resort.

S: I see. Finally, I've got two young children. Is there a kids' club in the day?

TA: No, I'm afraid there isn't. There's a babysitter service in the evenings. The babysitter looks after your children in your room and you can go to the cinemas and restaurants.

S: Right. Thank you very much for your help and the information.

TA: You're welcome, madam. Do you want to make a reservation?

Lesson 5.2 Track 1.37

1

Hello. I'm Mei and I work in Beijing. I think the best way to get around Beijing is by motorbike. I've got a small motorbike and it's the quickest and cheapest way for me to travel. In Beijing, the buses are really crowded and I don't like them at all. The metro is the fastest way to travel, but it's not very large. Many people use bikes, but my motorbike is faster than a bike! It takes me 30 minutes to get to work.

2

Hi, my name is Fuad and I study at Cairo University. Travelling around my city is not very easy because the roads are very small and very busy. The metro here is quite small and my college isn't on a metro line. That's a pity because the metro is the most comfortable way to travel in Cairo. I travel by bus to college. It's the cheapest way to travel, but it's also the most popular, so the buses are very crowded. I never get a seat and it takes about an hour to get to my college!

3

I'm Sandra, and I live in Amsterdam. Every day I cycle to university. It only takes me about 20 minutes. A bike is

the cheapest way to travel, of course, and it's also very popular here, because the city is very flat. In the city centre, trams are the best way to get around – I always use them when I go shopping. Many tourists travel on the canal boats, but I don't because they're the most expensive way to travel.

Lesson 5.3 Track 1.38

- 1 Check the departures board and see when the flight leaves.
- 2 I'd like a return ticket to Rio, please.
- 3 I usually travel in standard class, but sometimes my company pays and then I fly business class.
- 4 This airline has really good in-flight service. The flight attendants are really helpful.
- 5 I always ask for a window seat. I love the view of the clouds.
- 6 I always ask for an aisle seat because I've got long legs!

Travel agent, Sasha.

TA: Hello.

S: Hello, it's Sasha Kaplinski here.

TA: Hello Sasha. I've got your email about New York.

S: Great! I'd like to book the trip now. Have you got some details for me?

TA: Well, I've got two flights for you, one is with Oz Air, the other one is with Top Air.

S: Can you tell me about the Oz Air flight first? When does it leave?

TA: OK. Well, the flight leaves at eight in the morning and it arrives at seven in the morning, their time.

S: OK. How long does that flight take?

TA: It takes 14 hours.

S: Fourteen, that's not bad. And how much does it cost?

TA: Erm, it costs 300 Australian dollars.

S: That's a good price. Is it a good airline?

TA: Oh yes. The in-flight service is very good.

S: Fine, and what about the second flight?

TA: The second one is with Top Air. This is a very good airline. Their in-flight service is excellent – it's better than Oz Air's. You can have a head massage and the food is great.

S: Sounds good. When does it leave? And when does it arrive?

TA: Well, it leaves at six in the evening and gets there at 5 p.m., their time.

S: How much does it cost?

TA: This one costs 600 Australian dollars.

S: I see. How long does it take?

TA: It also takes 14 hours.

S: Mmm, that's good, but it's expensive.

TA: Do you want to make a booking now?

S: Erm, I think so. Yes.

Track 1.40

TA: Do you want to make a booking now?

TA: Thank you. And which airline would you like to travel with?

S: I'd like to book the Oz Air flight, please.

TA: OK. When do you want to travel?

S: Next Tuesday.

TA: Next Tuesday, that's the 1st of October, and what about the return flight?

S: One week later, please.

TA: OK, on the 8th, that's no problem. So, would you like business or standard class?

S: Oh, standard class. The company doesn't want to spend a lot of money.

TA: Fine, and finally, would you like a window or an aisle seat?

S: Oh, can I book that now?

TA: Yes, you can.

S: Excellent. Can I have a window seat, please?

Interviewer, David

I: Hello, David. Before you can join the Kids' Fitness Club, we interview you about your lifestyle – about what you eat and what you do in your free time. OK?

D: Fine.

I: Right. Have you got a large family? Do your parents work?

D: Well, I've got a sister, she's two years older than me, and yeah, both of my parents work. Dad's a policeman and Mum's a teacher.

I: OK. How much exercise do you do in your free time?

D: Exercise?

I: Yes, do you play any sports, for example?

D: Oh, no, not really. At school we have one sports lesson a week, but in my free time I don't do much.

I: Do you walk to school or cycle?

- D: I don't know, a lot. I play them all the time. About 30.
- I: OK, well, what about your diet? How much fruit do you eat? How many vegetables do you have each day?
- D: Well, Mum gives me an apple every day, but sometimes I don't eat it. Vegetables? Perhaps one or two. I don't eat them at school, they're boring.
- I: And how many pizzas or burgers do you eat?
- D: Oh, I don't know. About three burgers and a pizza each week, sometimes more. I eat a lot of chocolate and sweets ... oh, and I love crisps. Crisps are vegetables, aren't they?
- I: Well, not really, but ...
- D: So, can I join the club?
- I: Sure, but why do you want to join?
- D: Well, I know I'm overweight and I want to change that. And the gym sounds fun – my friends say you can watch TV when you're on the bikes.
- I: That's true. But you need to change your diet as well.
- D: My diet?
- I: What you eat. You need to eat more fruit and vegetables.

Lesson 7.2 Track 2.4

Presenter, Linda

p: Good afternoon and welcome to our weekly shopping programme *Shopaholic*. Now, are you an online shopper? Or do you prefer to queue at the supermarket? Linda Stanley of *Consumer World* magazine is with us in the studio to talk about Internet shopping. Hello, Linda.
l: Hi there!
p: First of all, Linda, is Internet shopping becoming really popular now?
l: Yes, it is. It's becoming part of our lives. More and more people are buying online.
p: Mmm, so what are they buying?
l: Books and CDs are the most popular things, and then travel. People are also spending a lot of money on health and beauty, and food and drink. For example, they're using the online services of supermarkets for big or heavy things like bottles of water.
p: Interesting. And how are people using the Internet to shop? I mean, how do they start?
l: Well, people are usually online for 12 to 18 months before they try online shopping. They usually start with something simple like books.
p: Yes, it's great for books. Are people comparing prices on the Internet now?
l: Yes, they are. It's easy to compare prices – there are special websites for this. So the Internet is giving people a lot of power.
p: I see. I guess men enjoy using the Internet. What about women? Are they using the Internet for shopping?
l: Yes, they are. Definitely. More and more women are shopping online. The great thing about the Internet is

this: it's 24/7. You can shop online all day, every day. This is very good news for busy women with jobs and children.
p: Of course. And what are companies doing to get business on the Internet?
l: Well, some companies are offering big discounts to get new customers. You can get a Harry Potter book, for example, for half price.
p: Is this the end of traditional shopping – you know, people going to shopping centres and supermarkets?
l: No, I don't think so – not just yet, anyway. Perhaps in the future. Right now, people are moving between the Internet and real shops to save time and money.
p: Well, it all sounds very exciting. Thanks for coming in and telling us about it, Linda.
l: My pleasure.

Lesson 7.3 Track 2.5

Brad, Zara

b: So, what advantages does downtown have?
z: Well, first of all, I think it's a nice place for people to visit, and there are some interesting local shops.
b: Oh yeah? What are they?
z: Well, there are some cafés and there's a music shop, and also an art shop. This means that people there are interested in the books we sell.
b: OK. Are there any more advantages?
z: Yes, another advantage is that the area is safe – crime is low. And, of course, there's a bus station.
b: Right. What about the disadvantages?
z: I think there are two main disadvantages. One disadvantage is that the rent is high and the other is that a lot of people go to the shopping mall outside the town. This means that sometimes there aren't very many customers downtown.
b: I see. So, the area is a nice one, but the rent is expensive and most people go to the mall.
z: Yes.
b: Mmm. What do you know about the shopping mall?
z: Well, it's ...

Lesson 7.4 Track 2.7

Track 2.7

Teacher, Nicolas

t: Are you ready to give your talk, Nicolas?
n: Of course.
Good afternoon everybody. In this short talk, I'd like to tell you about

my favourite store – Harrods, the huge department store in London. The building is beautiful, especially at night, when there are hundreds of lights outside. It's open every day of the week, including Sundays. There are seven floors, I think. You can find everything in Harrods: clothes, watches, books and DVDs, children's toys, things for your home and sports equipment. You can even buy a famous green Harrods shopping bag. And Harrods can order anything you want! It's famous for its fantastic food halls, and there are about 25 cafés and restaurants. One of the most interesting things is that there's even a doctor in the store – as well as a bank. To finish, I think Harrods is the best department store in the world! That's all. Thank you.

Lesson 8.1 Track 2.9

- 2 There were gardens everywhere.

Lesson 8.2 Track 2.10

(Tracks 2.11 and 2.12)

Tutor, Nathan, Marjorie

n: OK everyone! Today's presentation is by Nathan and Marjorie. Start when you're ready, Nathan.
n: OK. Hello everyone. Our presentation is called *A Smaller World* and it's about technology and cultural change. The talk focuses on technology that makes the world smaller, for example television.
m: First of all, can you imagine life without cars and planes? Before the invention of these means of transport, people could only travel by train or boat, and they couldn't travel very fast. Now, with cars and planes, we can travel further and faster. Some people even live in one country and work in another because they can fly to work. Fifty years ago, people certainly couldn't do that. And of course, many people fly thousands of miles to go on holiday, and while their grandparents could only read about distant places, they see them. Before we move onto the next type of technology, it is important to remember that planes and cars do have their negative points. They can be dangerous and they cause a lot of pollution, and this also changes the way we live.

AUDIOSCRIPTS

N: OK. Second, communications technology, like television and the Internet, certainly makes the world smaller. We stay in our house or office, but we can see news and shows from all around the world. With the Internet, we can write and chat to people all over the world. This is an incredible invention. We can find anything we want in seconds. It makes the world smaller, and it makes it faster! But do these things have any negative points? Well, yes, they do. Nowadays, people spend more time using the technology than they do meeting other people. We're spending more and more of our time in our houses, talking to strangers in other countries, than we are with our friends and neighbours. My grandmother could name all the people in her street, but I don't even know the names of my neighbours!

M: So, you can see that technology changes our way of life and culture, in both positive and negative ways. A lot of technology makes the world a smaller place, but does it make it a better place?

T: OK. Thank you Nathan and Marjorie, that was great. Are there any questions?

Alfred Nobel was born in 1833 in Sweden. He studied chemistry but he also wrote poetry, novels and plays. He tried to make a safe explosive, but, unfortunately, he killed his brother in an experiment in 1864. He invented dynamite in 1866. In 1895 he started the Nobel Prize Foundation.

Levi Strauss was born in Germany in 1829. He travelled to New York in 1846 and moved to San Francisco in 1853. He started a shop for gold miners: he sold equipment and clothes. In 1873 he invented jeans – he used a material from Nîmes in France and called it 'denim'.

Lesson 9.2 Track 2.19

Presenter, Stephen Bayley

- p: Welcome to this week's edition of *Understanding Science*. With me in the studio is Professor Stephen Bayley of Nottingham University. Professor Bayley, I'd like to start by asking you this question: what is the most important medical invention of the last 30 years?
- sb: Well, that's a difficult question because there are a lot of important inventions. Certainly, one of the most important is the MRI scanner.
- p: The scanner? Can you tell us something about it?
- sb: Yes, well, basically it's a big box with a hole in the middle ...

Track 2.20

- P: ... And how does it work?
- SB: Well, you lie in the hole and the scanner takes pictures of you. Like an X-ray machine, the MRI scanner can look into our bodies, but normal X-ray machines can only show the hard parts of our bodies, the bones and teeth for example, while the MRI scanner can show both the hard and soft parts of the body, so it's more useful. It can take a picture of the whole body and you get the pictures very quickly. It's not dangerous, either, like X-ray machines.
- P: That's good. When did scientists invent it?
- SB: Well, it didn't happen overnight. In 1945, scientists discovered NMR – Nuclear Magnetic Resonance. In the 1950s an American scientist named Felix Bloch did some experiments in the lab and understood the importance of NMR for looking inside the human body.
- P: So did Felix Bloch invent the MRI scanner?
- SB: No, he didn't. Another American, Raymond Damadian, and his team built the first full-body MRI scanner.
- P: When did they do that?
- SB: In 1977.
- P: And when did doctors start to use this new machine?
- SB: A few years later. In 1984, hospitals around the world bought their first MRI scanners.
- P: It all sounds fantastic. Are there any problems with the scanner?
- SB: Well, it isn't good for people who don't like small spaces!

Lesson 9.3 Track 2.21

Hello and welcome to *The nation's favourite everyday invention*, the show that tells you the story behind the everyday objects that we use in our daily lives. Each week, we tell you some key facts about the inventions and I tell you why I think they are wonderful or important. At the end of each programme, you can vote for your favourite invention. Simply send a text message to 0810 40 50 60, giving the name of your personal choice. So, vote for an invention and let's find our national favourite.

Track 2.22

The first of today's everyday inventions is that classic symbol of the English businessman – the umbrella. Nowadays, everyone has got one, but before 1750, men never carried umbrellas. So, what's

the story of the umbrella, or brolly?

Here are today's four facts.

First, many hundreds of years ago, rich and important people in hot countries such as China, India and Egypt used umbrellas. These rich people did not use their umbrellas in the rain, they used them in the sun. Of course, poor people worked in the sun, but they didn't have umbrellas.

Secondly, the Chinese invented the first umbrellas for use in the rain. They put oil and wax on their paper umbrellas.

Thirdly, umbrellas reached Britain about 400 years ago, but, at first, only women had umbrellas: men didn't like them. In 1750, Jonas Hanway, a British traveller, was the first man to use an umbrella on the streets of England. Other men followed his example and the umbrella at last became very popular in Britain. And finally, the first umbrella shop, James Smith and Sons, opened in London in 1830, and it's still open today.

And did you know that over 7,000 people lose an umbrella on London Transport every year, and all these umbrellas go to the Lost Property office. That's a lot of umbrellas!

Track 2.23

So, why vote for the umbrella?

Well, the most important reason is that it's one of the oldest inventions in the world. People found it very useful thousands of years ago, and we still find it useful today.

Secondly, the umbrella is a great invention because it's got several different uses. We can use it in the rain, we can use it in the sun and we can use it as a walking stick.

Thirdly, vote for the umbrella because umbrellas bring colour to our grey, rainy streets.

My final reason is that umbrellas are very cheap to make and cheap to buy.

So, that's the wonderful umbrella. When it rains, the rich and the poor can all stay dry. It's an invention for everyone. If you think this is the greatest everyday invention, vote now by sending a text message to ...

Track 2.24

Lesson 9.4 Track 2.26

Hedy Lamarr was very famous in the years before the Second World War. She was born in Vienna, Austria, in 1913. As a child, she grew up in Vienna.

Later, when she was a teenager, she went to acting school in Berlin. Then, in 1932, she acted in the European art film *Extase*, and she became famous.

The next year, she married Fritz Mandl, the first of her six husbands. Mandl sold weapons to Adolf Hitler in the years before the war. During her marriage, she learnt many things from her husband, but after four years, she left him and she went to London. After that, she went to America and she became a Hollywood star. At that time, people called her the most beautiful woman in the world. In the summer of 1940, she met George Antheil, a composer. She and George developed a radio communications system for submarines in 1942. In 1966, she wrote a book about her life, *Extase and Me*. She died in 2000.

Review 7–9 Track 2.27

Manager, Customer

- M: Hello. I'm the manager of this supermarket and today we're talking to some of our customers. Do you have five minutes?

- C: Yes, OK.

- M: Great. What are you buying today? Food or clothes?

- C: Food and clothes. I always buy food on Mondays and today I'm also looking for some clothes for my children.

- M: OK. And do you usually pay by credit card?

- C: Yes, I do but I'm using cash today.

- M: I see. And on average how much do you spend here every week – under or over 100 pounds?

- C: Oh, probably over 100 pounds.

Track 2.28

Shop assistant, Customer

- sA: Hello, can I help you?
 c: Yes. Could you show me some mobile phones, please?
 sA: Certainly. We have over 15 different designs. Which phones would you like to see?
 c: I don't know. There are so many!
 sA: This one is the best.
 c: Why?
 sA: Well, it has two main advantages. The first advantage is the camera and the second is that you can watch TV on it.
 c: Yes, but that means it's the most expensive. Sorry, but I'd like something simpler.
 sA: That's no problem. This model is half the price.
 c: Does it have games?
 sA: No, I'm afraid not, but it has a camera.

what you're doing? Don't let anyone see you put in your PIN number.

Another important point. If you carry a bag, carry your bag carefully. Make it difficult for someone to take it off you. And if you carry just a wallet, you should keep it in your jacket, in an inside pocket, not in the back pocket of your trousers.

Now, that brings us to some things you shouldn't do. You shouldn't carry a lot of cash about with you. By that, I mean lots of big notes, and coins. You can replace traveller's cheques and credit cards. But you can't replace lost cash.

Next, you should never take your money out of your wallet or purse in busy public places. This one is obvious, isn't it? Don't attract the attention of thieves by counting your money on a busy street! OK. Any questions so far?

- s1: Should I wear a money belt when I go out?
 sc: Well, most people here don't wear money belts. Also, money belts are often uncomfortable so I don't think that it's necessary, but it's up to you, I suppose.
 s2: Last night, some of us went out to a café. One of the girls had her mobile phone on the table all the time. Is that OK?
 sc: Well, no, she shouldn't do that. That's really not a good idea. She should keep it in her bag.
 s3: Should I leave money in my university room?
 sc: The rooms are generally very safe, but, no, you shouldn't really have a lot of cash in your room, just in case. Any other questions? OK, now let's move on to talk about personal safety ...

- r: Right, well, if you're sure. Erm, what's your opinion about having credit cards?
 d: Well, personally, I think that they're a bad idea. It's very easy to spend more than you can afford.
 r: And you, madam, what's your opinion?
 k: Well, in my opinion, they're great. They give you a chance to buy expensive things when you want them. You don't have to wait for them.
 r: OK madam, and do you think that saving money is important?
 k: Erm, yes, I suppose it is, but to be honest, I don't save very much each month. I prefer to spend my money now.
 r: And sir, do you think that saving money is important?
 d: Oh yes, definitely. When you're old, you can't live without money, so I save something every month, for my pension.
 r: Right. Do you think that borrowing money from friends is a good idea?
 d: Oh, no, not at all. I think that it's a terrible idea because if you forget to pay them back, well, things can get very difficult, can't they?
 r: Mmm, I guess so. And you, madam, do you think that it's a good idea?
 k: Well, I'm not sure. It's cheaper than borrowing from banks. But you have to be careful, you shouldn't borrow a lot or often, and of course, you have to remember to pay your friend back!
 r: OK. Finally, do you agree that people should give money to charity every month?
 k: No, not at all. I believe that the government should look after everyone. My money is my money.
 r: And you, sir? Do you agree that we should give money to charity?
 d: Well, yes, I do. We should give some money, but we aren't very rich so I can't always give something, but I do try, when I can.
 r: Well, thank you very much ...

Lesson 10.1 Track 2.29

Sue Cutler

Good afternoon, everyone. How are you today?

My talk this afternoon is about how to stay safe in the city.

First of all, let me tell you that the city of Sheffield is actually one of the safest cities in the UK. Most other big cities are much more dangerous than here. So don't be scared! But we should always be careful and look after ourselves and our possessions.

We can talk about our personal safety later, but let's start by saying something about looking after our money. Here are a few things you should and shouldn't do. A lot of this is common sense, of course, and I'm sure you already do most of these things in your own countries.

Track 2.30

Sue Cutler, 3 Students

sc: Anyway, here goes, starting with the things you should do. Number one – you should be careful in crowded places. By this, I mean on trams, on buses, in busy markets and shopping streets. Pickpockets – that's people who steal your wallets, purses, cameras and so on – pickpockets love crowded places. So take care.

The next thing is about cards, credit cards and debit cards. You should keep your PIN number safe and secret – only you should know it. Cashpoints are usually outside banks. When you use them, have a look at who is behind you. Are they too close? Are they interested in

Lesson 10.3 Track 2.31

Researcher, Katie, David

- r: Excuse me, I'm working for a bank and we're doing a survey about money. Can I interview you?
 k: Well, actually we're rather busy.
 d: Yes, we're doing the shopping and we have to be back at the car park in ten minutes.
 r: I understand, but it's only a short interview, and you can win a holiday to Thailand.
 k: Really? Well, I don't see any problems.
 d: But darling, we should finish the shopping.
 k: Five minutes isn't a problem, is it, David? So, what's the first question?

Track 2.32

- r: OK madam, and do you think that saving money is important?
 k: Erm, yes, I suppose it is, but to be honest, I don't save very much each month. I prefer to spend my money now.
 r: And sir, do you think that saving money is important?
 d: Oh yes, definitely. When you're old, you can't live without money, so I save something every month, for my pension.

Lesson 10.4 Track 2.33

Part 1

Sue Cutler

Right, I expect you want to open a bank account while you're here, so this next part of my talk is about the banks in Britain and their student services. There are four main or high street banks in Britain. They are, first of all, NatWest, that's spelt N-A-T-W-E-S-T. Secondly, Barclays, that's B-A-R-C-L-A-Y-S. Thirdly, HSBC, H-S-B-C and finally, Lloyds TSB. That's two words. LLOYDS, double L-O-Y-D-S, then T-S-B, Lloyds TSB. All of these banks offer student bank accounts and there are some differences between these accounts.

OK, so, first of all, the NatWest student account. This account offers an interest-free overdraft. As well as this, you can get a credit card and the interest rate for that is about 18.9 percent per year. Also, the bank offers discounts on train fares in Britain.

Track 2.34

Part 2

The second account is with Barclays. Like the NatWest account, there's an interest-free overdraft. In addition, this bank offers a credit card with an interest rate of 19.9 percent, so it's more expensive than the NatWest card. With this account, students also get free mobile phone insurance. I imagine that's popular with many of you.

Track 2.35

Part 3

Right, now the HSBC account. This account also has an interest-free overdraft. In addition, there's a credit card and the interest rate is 18.9 percent. As well as this, students get a free driving lesson.

Finally, the Lloyds TSB student account offers an interest-free overdraft. Also, students get a credit card with an interest rate of 17.9 percent. Unfortunately, this account doesn't offer any discounts or free services.

So, that's an overview of the four main banks and their student accounts. Are there any questions?

Lesson 11.1 Track 2.36

- 1 I'll be rich.
- 2 You'll have three children.
- 3 She'll buy a sports car.
- 4 He'll live alone.
- 5 It'll make them happy.
- 6 We'll speak excellent English.
- 7 They'll go to Australia.

Lesson 11.2 Track 2.37

Interviewer, Martin, Simon, Vicky

1

- i: What was your score?
- m: I got 36, but my flatmate, Richard, only got 25.
- i: Right, and what are you going to do? What changes are you going to make?
- m: Well, I'm going to have showers in the future, no more lovely hot baths for me. Richard is going to make more changes.
- i: Oh yes, what's he going to do?
- m: Well, he's going to recycle things, like paper and glass. At the moment he doesn't recycle anything, which is terrible. Also, he's going to turn things off, especially his CD player as he always leaves that on standby. Oh, and he's going to cover his saucepans when he's cooking – but that isn't very often!

2

- i: What was your family's score?
- s: Yes, well, we got 40, but we're going to make some big changes anyway.
- i: Oh yes, such as?
- s: Well, we're going to buy a solar panel and some low-energy light bulbs. We think that the solar panel will be a great idea for us because we'll save money. The children are young, so they can't do a lot, but they're going to recycle their paper – they do a lot of pictures and drawings. We aren't going to have showers because we haven't got a shower at the moment – only a bath.

3

- i: What was your score?
- v: Oh, it was very good, I got 35.
- i: I see, and what are you going to do to go greener?
- v: Oh, I'm too old to change a lot. I'm not going to do anything new. I recycle everything, I turn everything off. What more can I do? Solar panels are very expensive.
- i: Why don't you buy green electricity?
- v: Oh, I'm not sure, is that easy to do?
- i: Yes, it is now. We can find a company for you and you don't need to change anything in your house.
- v: That sounds a good idea. Let me think about it.

Track 2.38

- 1 I'm going to find out about green electricity.
- 2 She isn't going to buy a wind turbine because it's expensive.
- 3 We aren't going to change anything. We're already very green.
- 4 They're going to turn off their TVs with the on/off button.

- 5 Are you going to make any changes?
- 6 He's going to cycle to work every day.

Lesson 11.3 Track 2.39

Estate agent, Conor

- ea: Hello, Find-a-Flat-Fast. How can I help?
- c: Ah, hello. I'm looking for a flat to share with a friend. Hello, can you hear me?
- ea: Yes, I can. How many bedrooms do you want?
- c: Two bedrooms.
- ea: OK, let's see. I've got one here, it looks lovely – two bedrooms, kitchen, living room, two bathrooms ... ground floor with a garden ... , but there's no furniture, just a cooker and fridge-freezer in the kitchen.
- c: That's OK. How much is the rent?
- ea: It's 150 euros a week per person.
- c: Oh, that's expensive. We're students.
- ea: OK, here's another one. It's got two bedrooms, and both are large. There's a small kitchen, a dining room and a living room. There's also a large bathroom.
- c: Right. What floor is the flat on?
- ea: It's on the fourth floor, and I'm afraid there isn't a lift.
- c: I'm sorry, could you repeat that, please?
- ea: Sure. It's on the fourth floor.
- c: And there isn't a lift?
- ea: That's right.
- c: OK, erm ... what furniture is there?
- ea: Well, in each bedroom there's a bed, a desk and a wardrobe. In the kitchen there's a cooker, a fridge-freezer and a washing machine. There's a table with chairs in the dining room and a sofa in the living room.
- c: Just a moment. So, there's a cooker, a fridge-freezer and a washing machine. Is that right?
- ea: Yes, it is.
- c: What about the local area? Is it near public transport?
- ea: Well, there's a bus stop about 15 minutes away.
- c: I'm sorry, could you say that again?
- ea: Sure. There's a bus stop about 15 minutes away.
- c: A bus stop. OK. And, was that 15 or 50 minutes?
- ea: Fifteen, one five.
- c: What about trains?
- ea: I'm afraid there isn't a local station.
- c: Mmm, and how much is it?
- ea: It's 90 euros a week, per person.
- c: I'm sorry, did you say 19 or 90 euros?
- ea: No! It isn't that cheap! It's 90, nine zero. Would you like to see the flat?

AUDIOSCRIPTS

c: Well, we really need a flat near a train station, so I don't think that we will. But thanks for your help.
Goodbye.
EA: Goodbye.

Lesson 12.1 Track 2.42

Peter, Kirsty

P: G'day.

K: Hi there!

P: My name is Peter Knight. I'm doing research into people who grow up in different countries and I'm talking to people here at the university today. Is it OK if I ask you a few questions?

K: Sure, go ahead.

P: Well, first, tell me, have you ever lived abroad?

K: Yes, I have.

P: Oh, that's lucky for me! What's your name?

K: Kirsty Andrews.

P: OK, Kirsty. Which countries have you lived in?

K: Erm ... England, Oman and Japan. That's it, I think.

P: Why have you lived in so many places?

K: Because of my Dad's job.

P: I see. And ... erm ... what's your favourite country?

K: Australia! No, seriously, I really like Japan. It's amazing! It's so different.

P: Can you speak Japanese?

K: A little bit, yeah [yes].

P: Have you ever worked in any of these countries?

K: No, I haven't.

P: OK. Next question. Has your experience changed you in any way?

k: OK. Let me see ... well ... I know a lot more about the differences between cultures ... and I don't think that my way is the best way or the only way.

P: What about friends? I mean, do you see your old friends from the different countries?

K: Yeah, that's a problem. My best friend is in Japan. She's visited me once or twice here and we send emails all the time but I still miss her a lot.

P: I can understand that. Right ... final question ... are there any other countries you'd like to live in?

K: Well, I've never lived in a poor country. I think it could be an important experience. Maybe an African country, or something like that. And I haven't lived in South America. I'd like to spend some time there. Maybe I'll do these things after graduation.

P: Right ... I'll let you get on with your lunch. Thanks a lot for your time, Kirsty.

Track 2.43

- 1 We've visited a lot of interesting places.
- 2 I've changed a lot in the last ten years.
- 3 She's talked to people from a lot of countries.
- 4 He's watched films in different languages.
- 5 They've moved house several times.

Lesson 12.3 Track 2.44

Interviewer, Woman

I: What's the tallest building you've ever seen?

w: The tallest building? Well ... let me see ... erm ... I haven't seen many really tall buildings, but last year I went to New York and I visited the Empire State Building, and I really liked it. Erm ... I first saw the building from the plane. That was fantastic; it made me think of the film King Kong. Then I visited the building the next day. It's very tall and it's also beautiful, I think. It's different from most tall buildings because erm ... it's made of bricks and has a lot of windows. Other tall buildings are all glass, so it's very different, and that's why I think that it looks beautiful. Anyway, I went to the top of the building in the lift, and the view from the top is wonderful. You can see all of Manhattan in every direction – the yellow taxis look so small, like tiny insects! Well, what else? Oh yes, I also went up

the building at night. That was great – you can see all the lights of New York City below your feet. That was a very special moment for me. So, that's the tallest building I've seen.

Lesson 12.4 Track 2.45

OK, now I'm going to talk about technology and learning. First of all, the Internet. There are several ways you can use it to improve your English, because you can read, listen and write.

Writing practice is excellent for your learning; it's almost as important as speaking. On the Internet there are two places where you can write – message boards and live chat rooms. Live chat rooms are great for improving your fluency, because you have to write quickly. It's like a conversation. A message board is good for both fluency and accuracy because you can think and prepare before you write. Both are excellent for communication practice.

Now, the Internet is a good place to practise your listening. You should visit a good news site, such as the BBC, and watch the short video clips. Before you watch, you can read about the story, and then you can watch the clip as many times as you want. Often these are short and you can watch clips about news and sports, even music. In order to improve your listening, you have to be an active listener: make notes, try to write down the main points, try to write down new vocabulary.

Finally, on the Internet there are many sites for English language learning. Have you visited the website for this book? There are extra practice exercises and reading materials. The BBC World Service also has an excellent site for learning English, with special message boards for learners.

The best thing about the Internet is that it gives you the chance to do things with the language, and that's very important. All right? Good, now I'm going to talk about ...

Track 2.46

In conclusion, the important thing is to do lots of different things:

'We remember 20 percent of what we read, 30 percent of what we hear, 40 percent of what we see, 50 percent of what we say, 60 percent of what we do and 90 percent of what we read, hear, see, say and do. So, follow my advice and enjoy practising your English outside the classroom.'

2 Men

1

M1: Hello.

M2: Hello. I'm interested in the bike for sale.

M1: OK. Great. Well, it's about two years old.

M2: Sorry, did you say two?

M1: Yes. And it's 50 pounds.

M2: Sorry, was that 15 or 50?

M1: Fifty. It's a mountain bike.

M2: That sounds good.

M1: What else do you want to know about it?

M2: Erm, I don't know really.

M1: Well, would you like to see it then?

M2: Yes, I could come this afternoon ...

2

Man, Woman

M: Hello.

w: Hello. I'm interested in the CD player for sale in the paper.

M: OK. Well, it's new. It's still in the box.

w: Sorry, what did you say?

M: It's in the box. I've never opened it.

w: Oh. And how much is it?

M: I paid 50 pounds for it. So it's 30 pounds. OK?

w: Sorry, can you repeat that?

M: It's 30 pounds.

w: OK. Could I come and see it?

M: Sure.

w: Where do you live exactly?
